

▶ Product Overview

Polycom® SoundStructure™ Headset Interface Adapter

Enables direct audio connection between most business phones and a SoundStructure system via the phone's headset interface. Use the phone to initiate a call and press the headset button to send the audio to and from the SoundStructure system for in-room audio processing.

- ▶ **Connects SoundStructure to a standard telephone via RJ-9 headset interface**
- ▶ **Use the phone to dial or answer calls, with SoundStructure processing the audio**
- ▶ **Simple dialing interface when you don't have a control system**
- ▶ **Quick to add-in audio-only participants to any video call**

Package Includes:

- Headset Interface Adapter

Compatibility:

- SoundStructure C Series

PART NUMBER: 2200-33206-001
