

DATA SHEET

Polycom® RealPresence® VisualEdge™

Refined style, unleashed performance on your desktop

Communicating over video from your desktop is now much more than just talking heads on a screen. With the urgent pace of today's corporate environment, nothing is more important than providing clear, concise communications in a timely manner. And with our globally dynamic economy, the ability to keep up from your home or work office is even more critical because business does not stop at the end of the day.

Productivity Supercharged

The Polycom® RealPresence® VisualEdge™ is a unified communications (UC) system that gives you the proper tools to provide immediate and impactful collaboration. With production-quality camera optics, a walk-up-and-use intuitive interface and three downward firing speakers, including a built-in subwoofer, you immediately enjoy a rapid increase in productivity through a truly "in-person" experience—right from your desktop.

Incredible Design to Compliment Your Workspace

The stunning design of the RealPresence VisualEdge system gains your immediate attention. With a bright 27 inch HD display and an ultra-thin bezel, it is much more than a video conferencing system; it is a communication hub that instantly becomes your multimedia workspace. Simple plug-and-play connections for your computer or other video source allow you to share your workspace in vibrant 1080p resolution.

The innovative Polycom Unified Controller instant-on feature activates with a touch of a finger, delivering a unique control experience that is intuitive from the very first time you use it. For those who want complete privacy, simply pick up the attached handset or pair the system with an optional Bluetooth headset for additional freedom and workspace mobility.

Designed for the Evolving UC Environment

With Polycom's commitment to open standards and multi-vendor interoperability, rest easy knowing that the technology you deploy today interoperates with your existing equipment while fully able to serve you for many years to come. The RealPresence VisualEdge delivers on this commitment by supporting a broad range of compression technologies including H.323, SIP and SVC interoperability along with advanced telephony system compatibility. Additionally, you achieve full integration into your UC environment through the native compatibility with Microsoft® Lync™ and IBM® Sametime®.

Benefits

- **"In-person" experience achieved** – Forget about the technology and communicate eye-to-eye with high-definition video (up to 1920 x1080) and up to 60 frames per second for fluid motion and production quality experience
- **Natural conversations** – High-definition voice with Polycom® Siren™ 22 and StereoSurround™ delivering the broadest audio spectrum increasing comprehension and reducing conference fatigue
- **Increase Productivity on Desktop** – Large 27 inch display provides greater layout options of programs and video content
- **Control flexibility** – Multiple control options ranging from an innovative touch screen device to a simple to use remote control
